

# SHISHURAM DAS COLLEGE

## Department of Geography

### Programme Outcome

**PO1. Knowledge of Geographic Principles:** Students will be able to know the concepts of physical and human geography. They can identify and explain the earth's human and physical characteristics and processes, from global to local scales.

**PO2. Critical Thinking:** Students will be able to identify, interpret, and analyze geographic problems and processes. They will be able to evaluate the impacts of human activities on the natural environment.

**PO3. Communication Skills:** Students will have the ability to communicate geographic information through written, oral, graphical, and quantitative outlets.

**PO4. Social Interaction:** Enhance their power of social interaction and ability of observation through fieldwork experience where they find out social, economic, and ecological problems of a locality.

**PO5. Human Values:** Students will apply geographical knowledge to everyday living. They will appreciate and respect the diversity of perspectives, worldviews, and cultures. They will show an awareness and responsibility for the environment.

**PO6. Laboratory Skills:** Students will be able to apply scientific thinking, research design, interpretation, and documentation of laboratory experiments. They can understand theoretical concepts of instruments that are commonly used in most geographical fields as well as interpret and use data generated in geographical analyses.

**PO7. Environmental awareness:** Students will understand the relationship between man and the environment and gain knowledge about human geography and correlate it with their everyday lives.
